The Third International Congress at the Faculty of Medical Technical Sciences

The Faculty of Technical Medical Sciences at the University of Elbasan "Aleksandër Xhuvani" successfully held the Third International Congress "Recent Trends in Biomedical Research, the Current State of Biomedical Research in the Adriatic Area."

With wide participation from professors of partner universities in Bari, Aquila, and others, along with doctors, experts, professionals in the field, and students, this congress marked its undisputed success for the third consecutive year, becoming a platform for sharing ideas, experiences, and the latest discoveries. In his welcoming speech, the Rector of the University, Prof. Dr. Skender Topi, expressed his gratitude to all participants and organizers of this congress, acknowledged the achievements so far in the field of biomedicine, and the quality of the work of young Ph.D. students. Additionally, Prof. Topi introduced the First Journal of the Doctoral Cycle in Technical Medical Sciences, the first of its kind, whose works will serve not only science and biomedicine but also future generations.

The University of Elbasan participates in the Peace March

The Interfaith Cooperation Center in Elbasan organized the Peace March in the city of Elbasan, a traditional event held every year to promote dialogue and national solidarity. This year, the march was held under the inspiring motto: "Dialogue, a tool for national solidarity, yes to dialogue, no to conflict."

In addition to the religious communities, representatives of local government and deputies joined this event, conveying messages of peace, solidarity, and awareness. Present at the event was also the Vice-Rector of the University of Elbasan, Prof. Dr. Elvira Fetahu, who, in her speech on "The Commitment of Academics in Intergenerational Dialogue" stated:

"The University of Elbasan 'Aleksandër Xhuvani' has always been a part of this historic event, bringing students and academic staff to share the message of peace and cooperation. This higher institution of knowledge plays a crucial role in shaping young generations and raising their awareness of the importance of a harmonious society. Today, we march together to show that we are committed to the values of peace and solidarity. Our University's participation in this event is a sign of social and intellectual responsibility towards building a better world."

Scientific Conference 'EU Enlargement and the Challenges of Legislative Alignment in Albania'

At the University of Elbasan "Aleksandër Xhuvani," the Department of Law, within the Faculty of Economics, successfully held the Scientific Conference "EU Enlargement and the Challenges of Legislative Alignment in Albania". This conference is organized as part of the Jean Monnet program, bringing together experts, academics, and students interested in European integration for three consecutive days. In his welcoming speech, the Rector of the University, Prof. Dr. Skender Topi, highlighted the conference's contribution within the framework of the Jean Monnet Program in aligning the University of Elbasan with European universities, as well as its role as a promoter in advancing the legislative mechanisms that bring us closer to the European Union. The Rector emphasized the importance of this project for enriching the university curriculum by the Department of Law, offering modules and subjects aligned with European law.

University of Elbasan part of the EduGame Project

University of Elbasan participated in the first meeting of the EduGame project, funded by the European Union, to enhance the capacities gained by the University of Elbasan in collaboration with the project coordinator, Vytautas Magnus University, Kaunas, Lithuania.

This project has brought together a group of professors from nine universities spanning the Baltic region, the Mediterranean, the Western Balkans, and North Africa to launch this innovative initiative. EduGame is an effort to reshape undergraduate and master's curricula by integrating elements of gaming, digital storytelling, and the latest technologies such as GAI and XR in education. Through this project, the aim is to make learning more engaging and effective for students by setting a new standard for educational achievements and experiences, as well as to achieve a sustainable impact on educational methodology globally.
