**Call for participation**

We are pleased to invite submissions of papers for the 9<sup>th</sup> International Conference “Advances in Business, Finance and Law” that will be held at the Faculty of Economy, University of Elbasan “Aleksandër Xhuvani”, on 13 November 2021. This conference has a multidisciplinary approach and intends to present high quality theoretical and empirical research papers from a broad range of disciplines, including economics, business, finance, law, tourism, engineering, development studies, political science, international relations, and other related disciplines with a focus on the latest advances of these fields. A comparative perspective of these developments between Albania and Balkan or even European states would be of much interest and welcomed. The conference provides an excellent opportunity to conduct scientific exchanges on research findings within the conference fields.

Scientific research and innovation are important aspects of any country's integration process. The process of integration can only be a long process of legislative and economic harmonization that must necessarily be preceded by scientific studies and research that will provide reasonable assurance on their impetus. Thus, there is always a need to analyze and study coherently the current and future barriers to economic, politic and social development and the new prospects.

Our aim is to bring together academics, scholars, authors and PhD students from Albania and other Balkan and European countries to share their knowledge and exchange ideas on the recent developments regarding conference topics. The conference purpose is to establish a debate among national, regional, and international scientific community members on the challenges that the European integration process brings and possibly to provide models, demonstrating the approaches to be followed mainly by researchers in economic and legal fields, to enable their studies and research work to contribute to the process of integration and sustainable economic development. These can be economic and legal models which are currently being pursued or can be pursued in the future by the state aspiring the integration to European Union.

This conference intends to bring theoretical, practical and methodological contributions to the handling of specific topics related to research and innovation in all aspects of economy, law and intercourse with other areas in a multi-dimensional plan. At the same time it will affect the improvement and approximation of Albanian legislation with that of the EU countries in innovative aspects which may not have been addressed yet.

The conference will be focused, but not limited to the following **topics**:

- New EU economy prospects
- Business innovations
- Public sector innovations
- Social innovations
- Regional economic cooperation in Western Balkans Countries
